

### **REMARKS**

The present amendment seeks to correct typographical errors in the specification and claims.

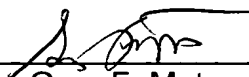

The specification and Claims 1 and 4 are amended to correctly recite that the polyether polyol of component b) has a polydispersity of from 1.01 to 1.5. The amendments are supported at, for example, on page 8, lines 4-6 and Table 1. Most of the listed Acclaim polyols have a polydispersity of between 1.01 and 1.1.

Claim 7 has been amended to properly place the period at the end of the sentence of the claim.

Entry of the amendment and early allowance of claims 1-13 are requested.

Respectfully submitted,

By
